PROFESSIONAL SUMMARY

Junior Full Stack Developer with experience in web application development using Ruby on Rails, Vue.js, and Python. Experienced in software development, technical support, and IT infrastructure. Bachelor's degree candidate in Information Systems at Fundação Hermínio Ometto (FHO - Uniararas, Brazil), with a strong interest in web development, APIs, and applied artificial intelligence.

PROFESSIONAL EXPERIENCE

Web Development Intern, **ESL Sistemas** 2025 – Present

- Develop and maintain features for Transportation Management Systems (TMS), delivering product requirements within established deadlines.
- Identify, analyze, and resolve software issues, contributing to the continuous improvement and stability of enterprise applications using Ruby on Rails.
- Actively participate in Agile teams, collaborating in daily stand-ups, backlog refinement sessions, and technical reviews.
- Provide technical support to end users, assisting with incident resolution and helping reduce system downtime.

IT Intern, **Artur Nogueira City Hall** 2023 – 2025

- Handled internal support tickets, contributing to an approximately 20% reduction in average issue resolution time while maintaining a stable IT environment.
- Performed preventive and corrective maintenance on computers and servers, ensuring the availability of the organization's IT infrastructure.
- Assisted in the development of an internal Work Order (WO) system to streamline administrative processes and improve operational efficiency.
- Provided technical support to multiple municipal departments, ensuring business continuity for internal users.

PROJECTS

Hybrid Search API 2026

Technologies: Python, FastAPI, Elasticsearch, SentenceTransformers

- Developed an API for document indexing and information retrieval using hybrid search techniques, combining lexical search (BM25) with semantic search powered by embeddings.
- Leveraged Elasticsearch as a high-performance search engine and non-relational data storage solution.

BeeWatts – Solar Calculator

2025

Technologies: Python, Django, Bootstrap, PostgreSQL, PVMCalc, OpenStreetMap, ViaCEP

- Developed a web application for photovoltaic system sizing, calculating the required number of solar panels, projected energy savings, and investment payback period.
- Integrated external APIs to retrieve geographic, address, and solar irradiation data, enabling personalized calculations based on the user's location.

EDUCATION

Bachelor's Degree in Information Systems, FHO

2023 – 2026

- 1st Place – 18th FHO Programming Marathon (2023)

SKILLS

- **Programming Languages:** Ruby, Python, JavaScript, HTML, CSS
- **Frameworks:** Ruby on Rails, RSpec, Sidekiq, Flask, FastAPI, Django, Vue.js, Tailwind CSS, Bootstrap
- **Tools & Technologies:** Docker, Git, GitHub, Linux, PostgreSQL, Elasticsearch, Insomnia, Postman
- **Languages:** Portuguese (Native), English (Upper-Intermediate – B2)
